

One-click conference calls

Innovative, cloud-based technology that allows you schedule and join a conference call at the click of a button

Speakserve

One-click **technology**

Get conferencing quicker with one-click

You can start a high quality conference call straight away using your room details. Alternatively, you can schedule a call with one click from your portal dashboard. When it's time to talk, find your scheduled call and join with a single click – it's that easy! We make it easier for participants to join your calls too, with one-click from their mobile.

Reliable **HD audio**

Enjoy crystal clear audio on every call

We're renowned for the quality of our audio even when dialling into a conference call from the remotest locations. Trusted by leading firms from major industries, our Tier 1 networks with multiple POPs mean you can count on us to give you an unparalleled conference call experience

How do you **benefit?**

Save valuable time with tools that make joining easy

Improve productivity and leave your guests in a good mood

Reduce administration, no unnecessary downloads or PINs

How do you **benefit?**

Focus on the quality of your conversations and not the quality of your connection

Remove the frustration of dropped calls

Hear every word without any interferences or delays

International **coverage**

Connect with your guests without paying a premium

Our international coverage excels beyond any other conferencing provider. With high quality audio in over 120+ countries across the world, your guests can join your conference calls using local or freephone dial-in access numbers or from any location in the world via our smart dial-out technology.

Dial-out **technology**

Make conferencing even easier with dial-out tools

Our smart dial-out technology is designed to quickly and easily connect your guests to your conference call. The system automatically dials-out to your chosen participant and let's them join the call without delay. You can also choose when you would like to dial a participant in to a call, giving you greater control over who and when you want to bring guests into your calls.

How do you **benefit?**

Stay connected no matter the location

High quality audio guaranteed across the globe

Lower your call costs with local and freephone numbers

How do you **benefit?**

Ensure your meeting always starts on time

Provide a more seamless and positive call experience

Get talking without the need to enter room numbers and PINs

Allow only selected participants to join your call at an allocated time

Dial-out to late or new guests as the call is in progress from your LiveView screen

HD call recording

Record and review your most important conversations

You can activate call recording across your organisation or switch it on or off for specific rooms. All HD recordings are stored securely according to your personal data storage plan and access is managed by user permissions. Use our voice analytics tools to search your conversations for key words and phrases making it even easier to review and replay.

How do you benefit?

-  Guaranteed high quality recordings
-  Get more control and added security over your call recordings
-  Record calls and store them securely on your online portal to meet data compliance
-  Replay your calls recordings and use Alice (our AI tool) to transcribe them in minutes

Smart call transcriptions

Automatically transcribe your next conference call with Alice

Alice (our AI) generates machine transcriptions in a matter of minutes even distinguishing between different speakers on your call. If you really want to impress you can request a professional human transcription. Whether you choose a machine or human transcription, you can access them from your online portal at any time. Here they can be stored and/or downloaded and shared with relevant parties.

How do you benefit?

-  Reduce administration for minute-taking and share meeting notes faster
-  Reduce time spent transcribing calls by 50%, allowing you to free up resources
-  Revisit key conversations and clarity around important discussions
-  Share your call transcriptions with those who need access without delay

Transparent pricing

Pricing structures that suit the way that you do business

We offer all businesses the flexibility to pick a pricing structure that suits them. You can choose to pay-as-you-go (PAYG) or choose one of our monthly bundles.

How do you benefit?

Choose payment terms that are tailored to your own preferences

Only pay for what you use, no subscription required

Centralised billing, you pay for your calls rather than your participants

“ We can set up our own conference calls, saving us time and money but also providing us with a greater layer of security around who is invited and who is on the call. We have instant access to call recordings and call summaries and can see how a call has cost as soon as it has ended ”

Tulchan Communications LLP

About Speaksolve

Founded in 2002, Speaksolve are the original pioneers behind the cloud-based conferencing space. Powered by our own technology, we provide professionals with a secure and easy-to-use conference call solution that supports the unique ways that they do business.
